

GENERATIVE CALENDAR 2025

MADE USING SOME SILLY CODE

hello y'all i am back here,
doing this ritual for another year!

// love & warmth, hetvi

<https://cosmicbhejafry.github.io>

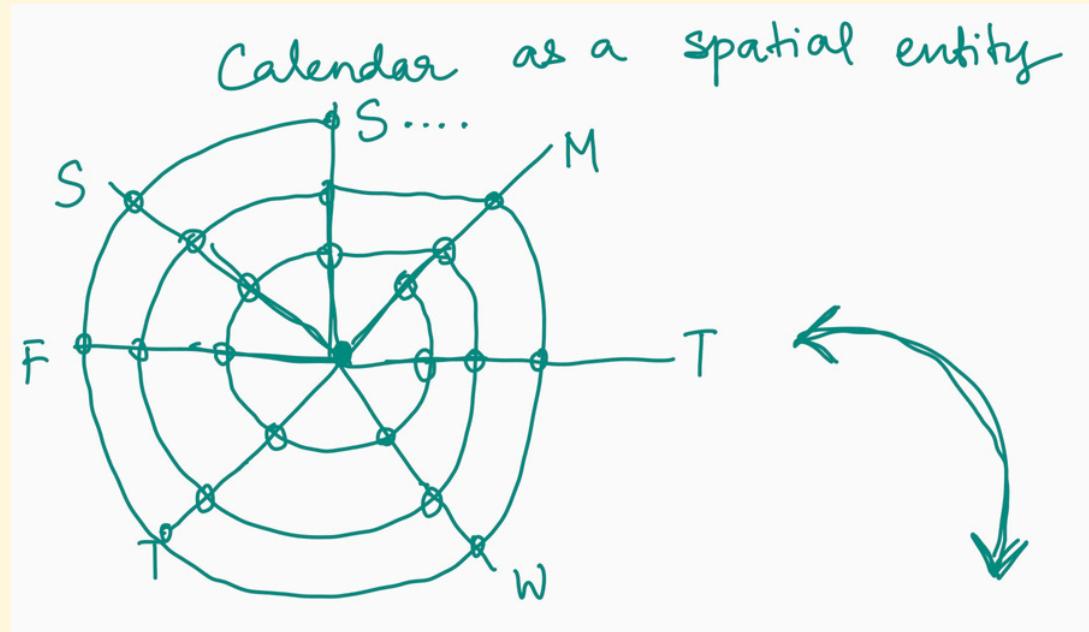

[cosmicbhejafry](#)

what is the shape of time?
what does time look like?

how does that affect our
calendars, our days, weeks,
lives?

Circularity, going in
circles
spiralizing, anxiety

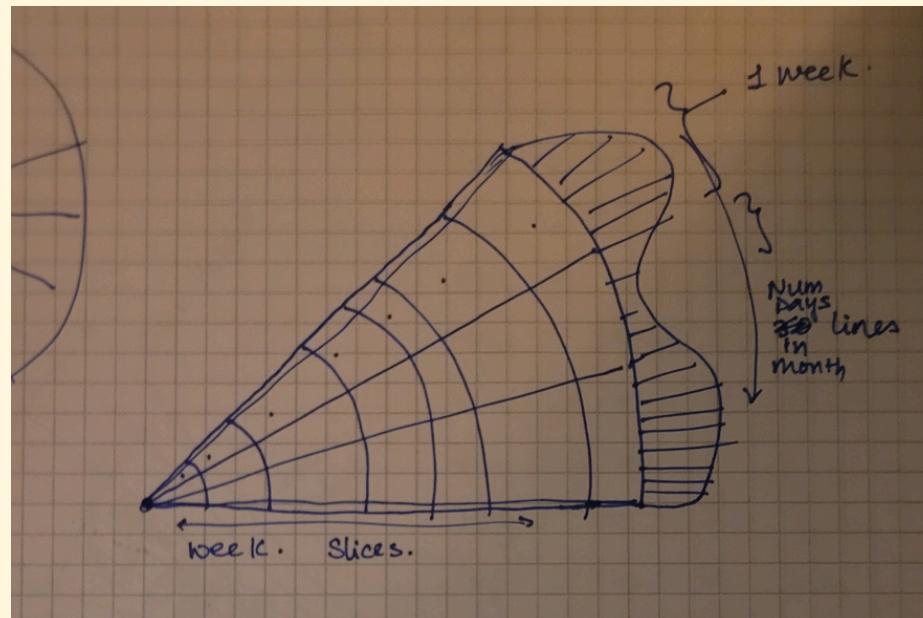

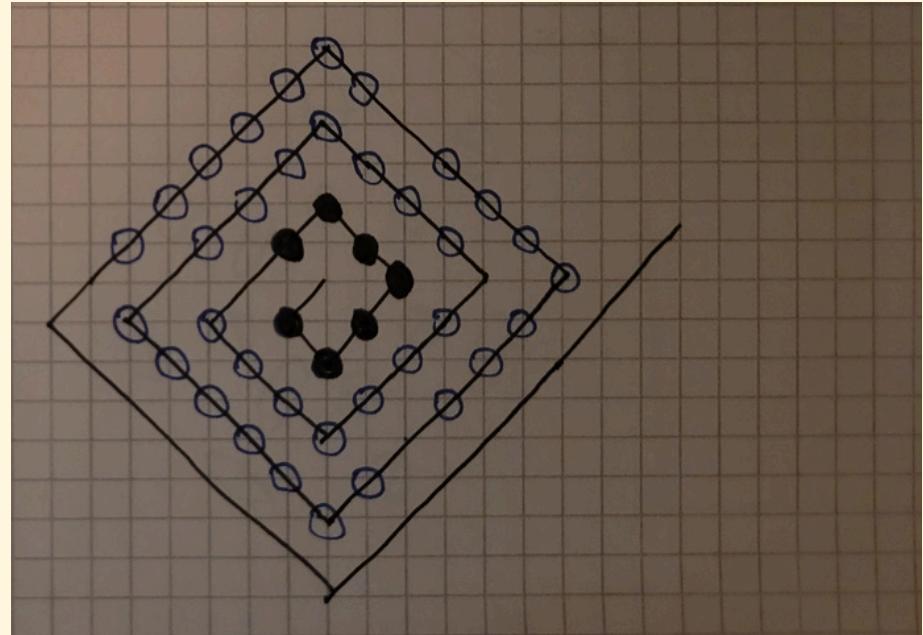

my calendar this year has been an archive
of missed and cancelled events,
of sudden changes

in my brain, my calendar has thus looked
a lot like a spiral

time has intensely felt like it was spiralling past more so than before, a juxtaposition of personal loss and seeing barbaric genocide and conflict worsen

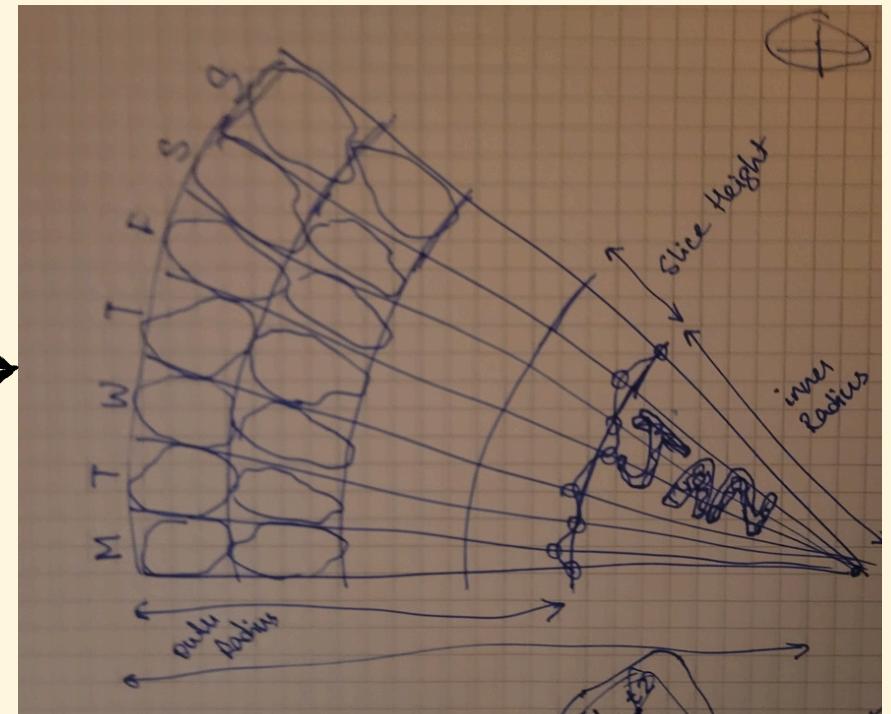

it has been a year laden with joy and grief, has had its fair share of both sweet and sour moments,

i feel like the year has handed me enough lemons that it could feature in a math problem

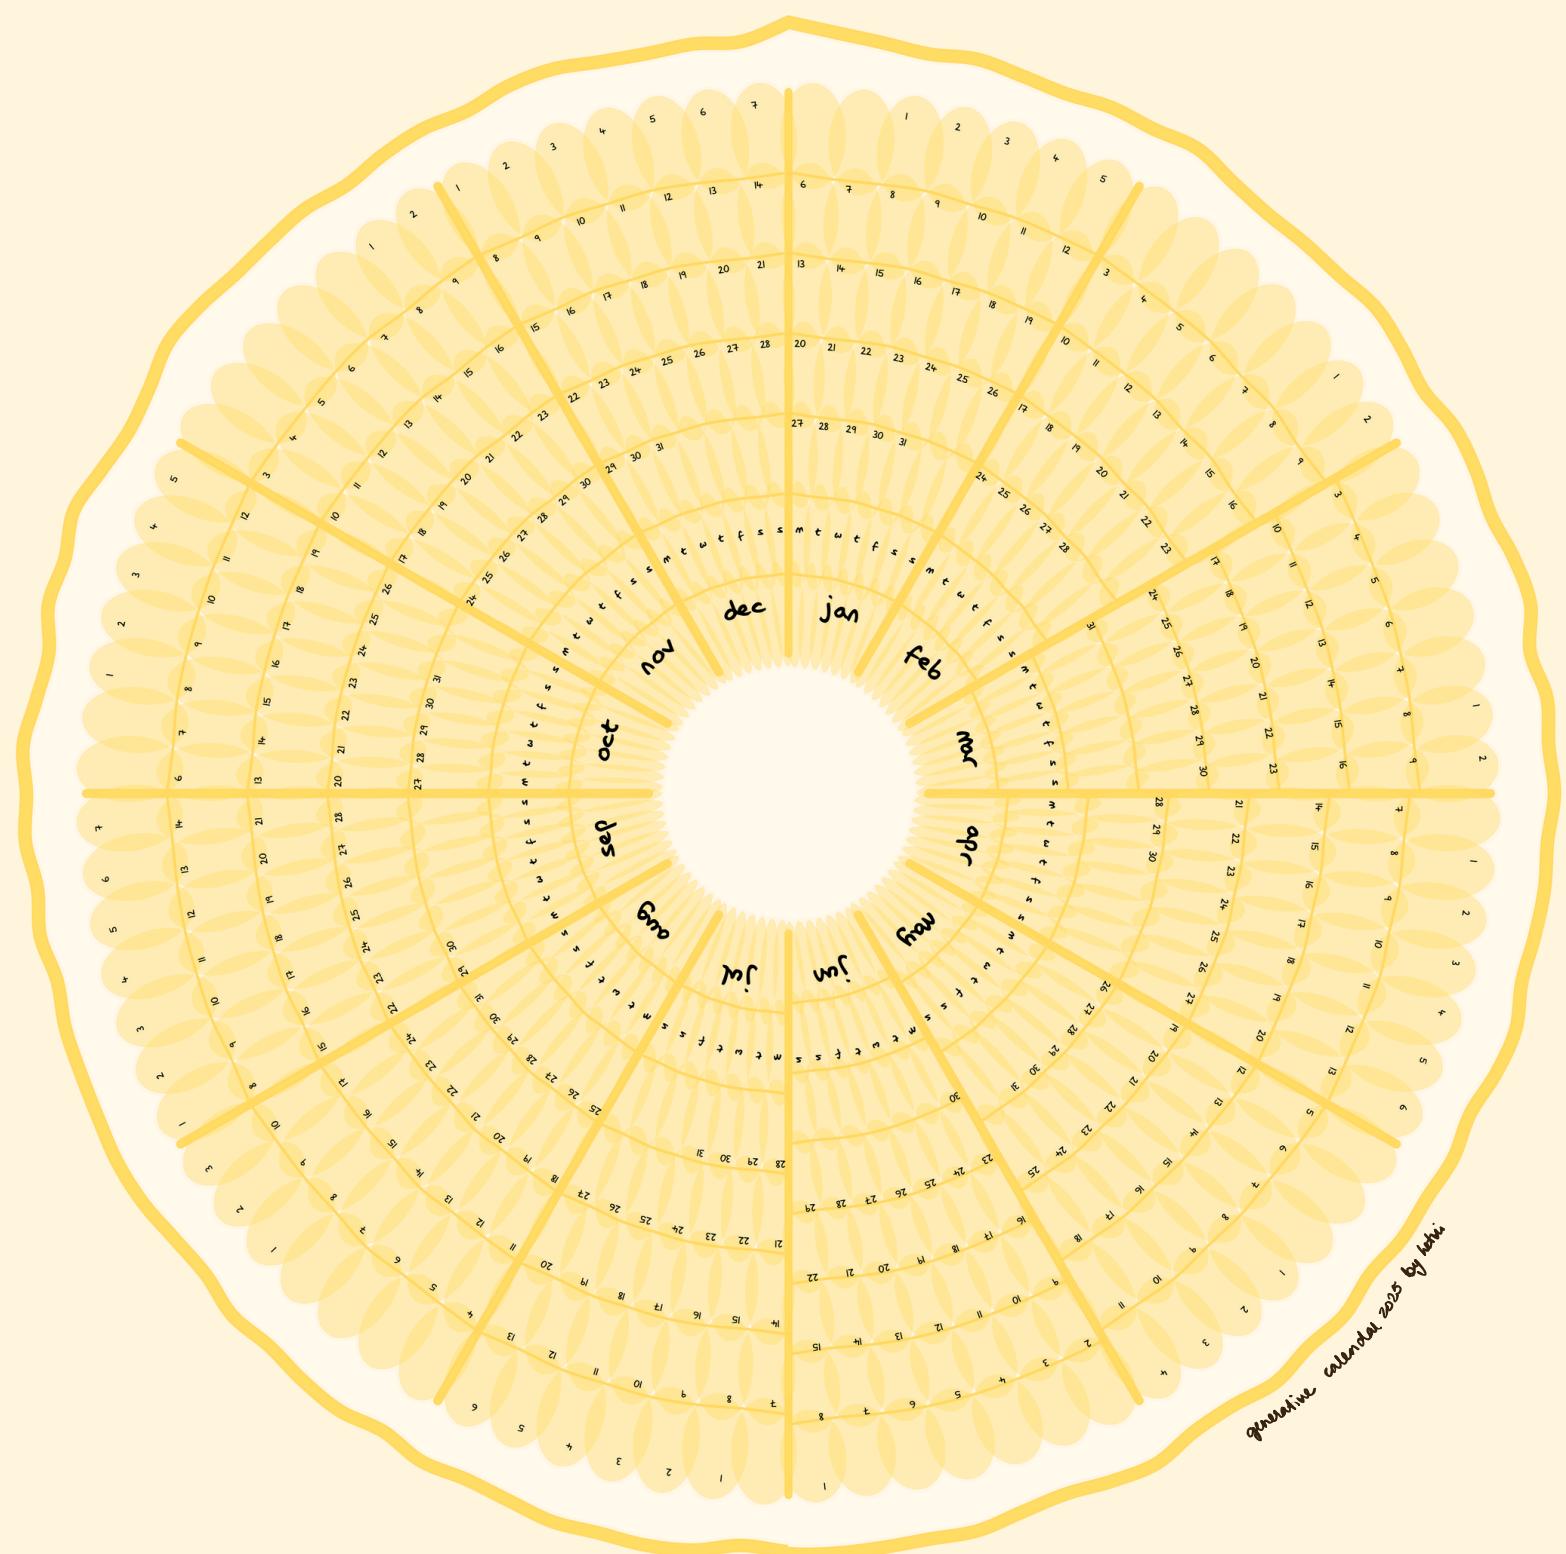

so when life gives you lemons, *what do you do?*

i made a lemon calendar :)

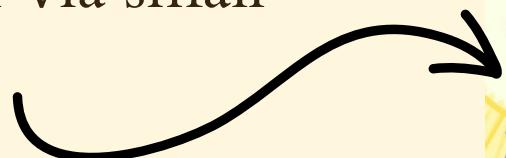

the lemon to calendar pipeline is real

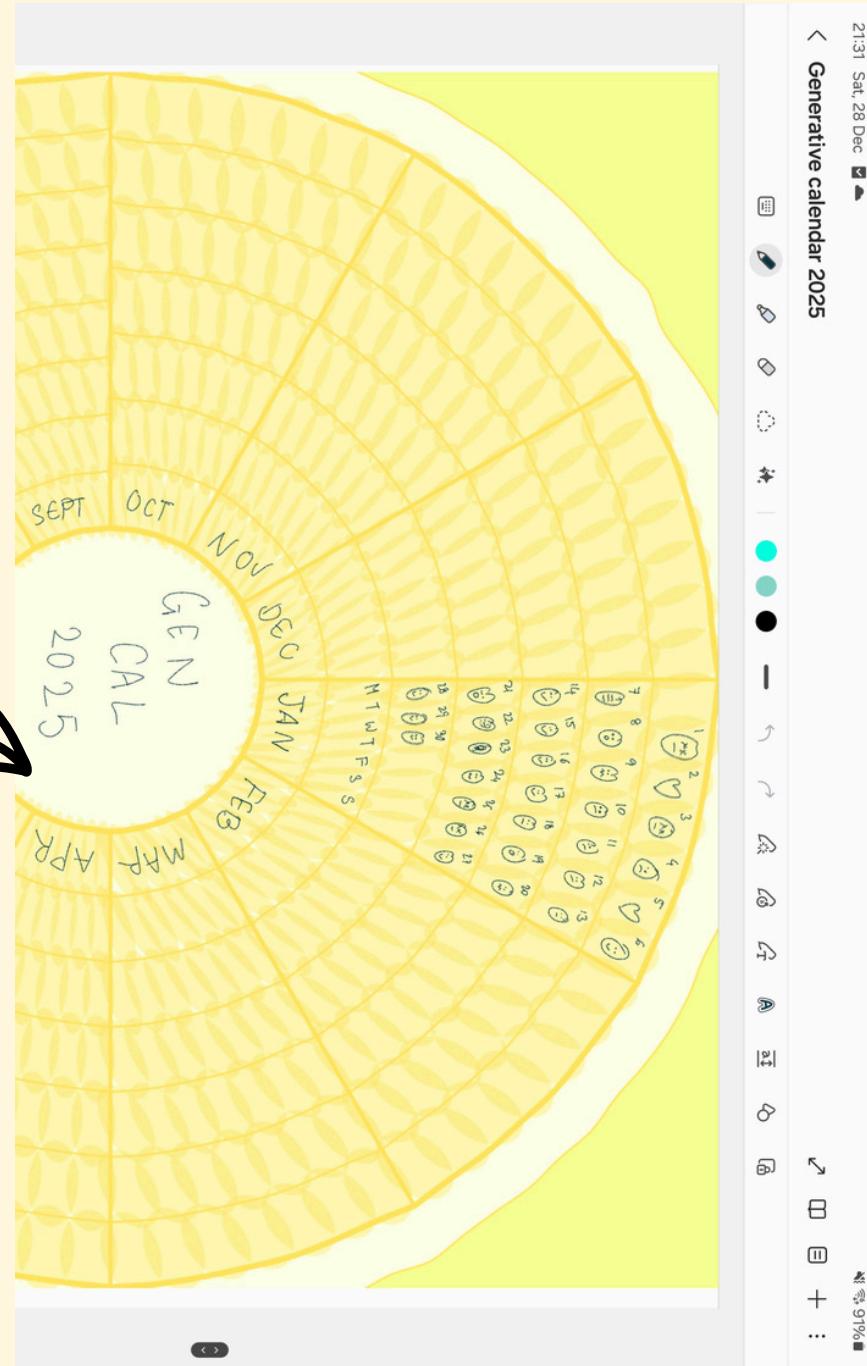

it isn't exactly designed to be used like a normal planner

i'm going to be using it as a mood or general life tracker via small emoji-like doodles

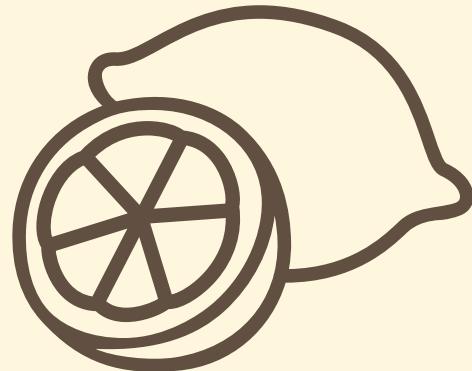

please feel free to use it in whatever way you fancy! <3

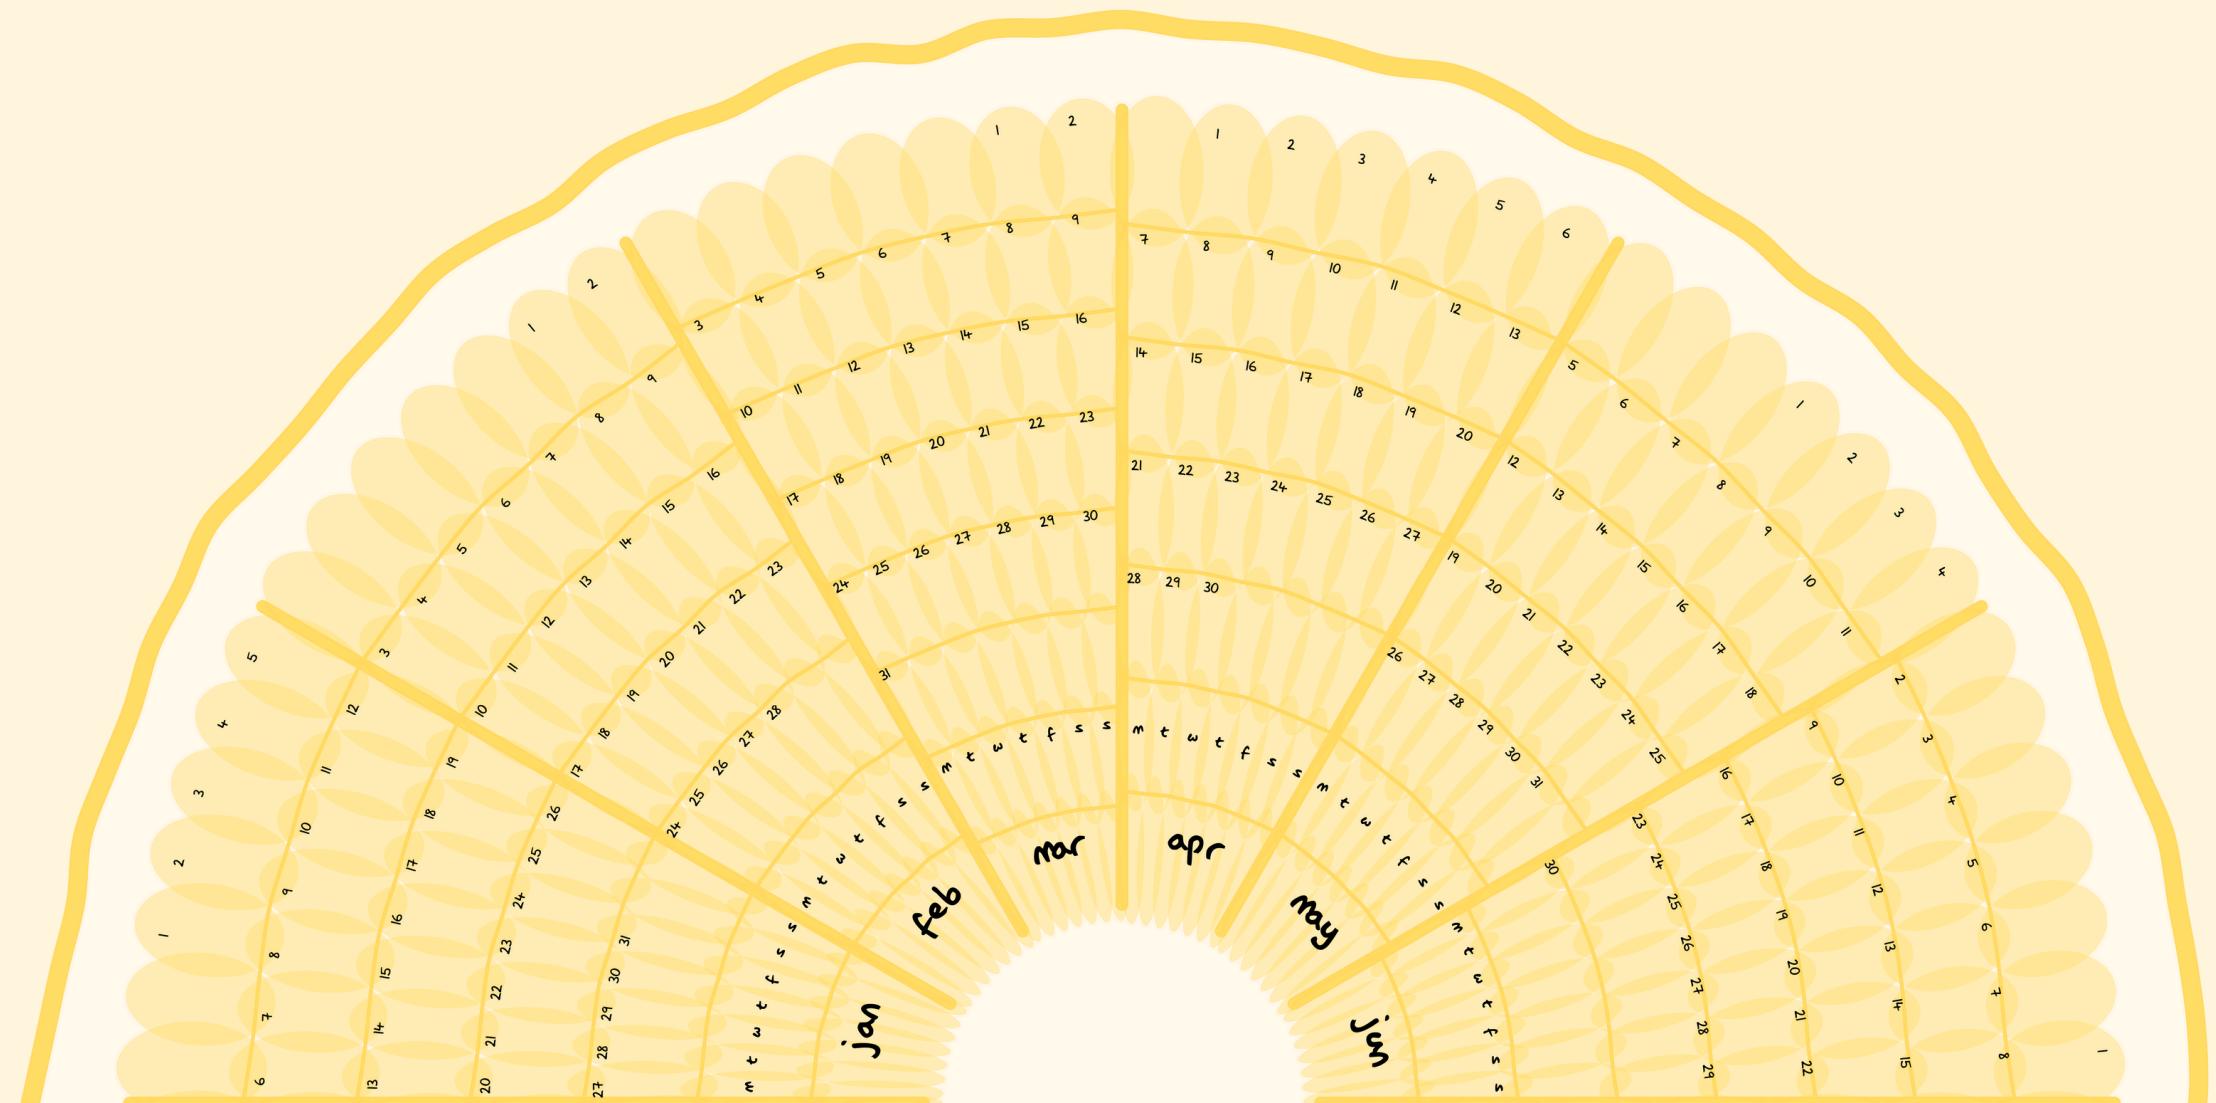

as always, printables + instructions follow

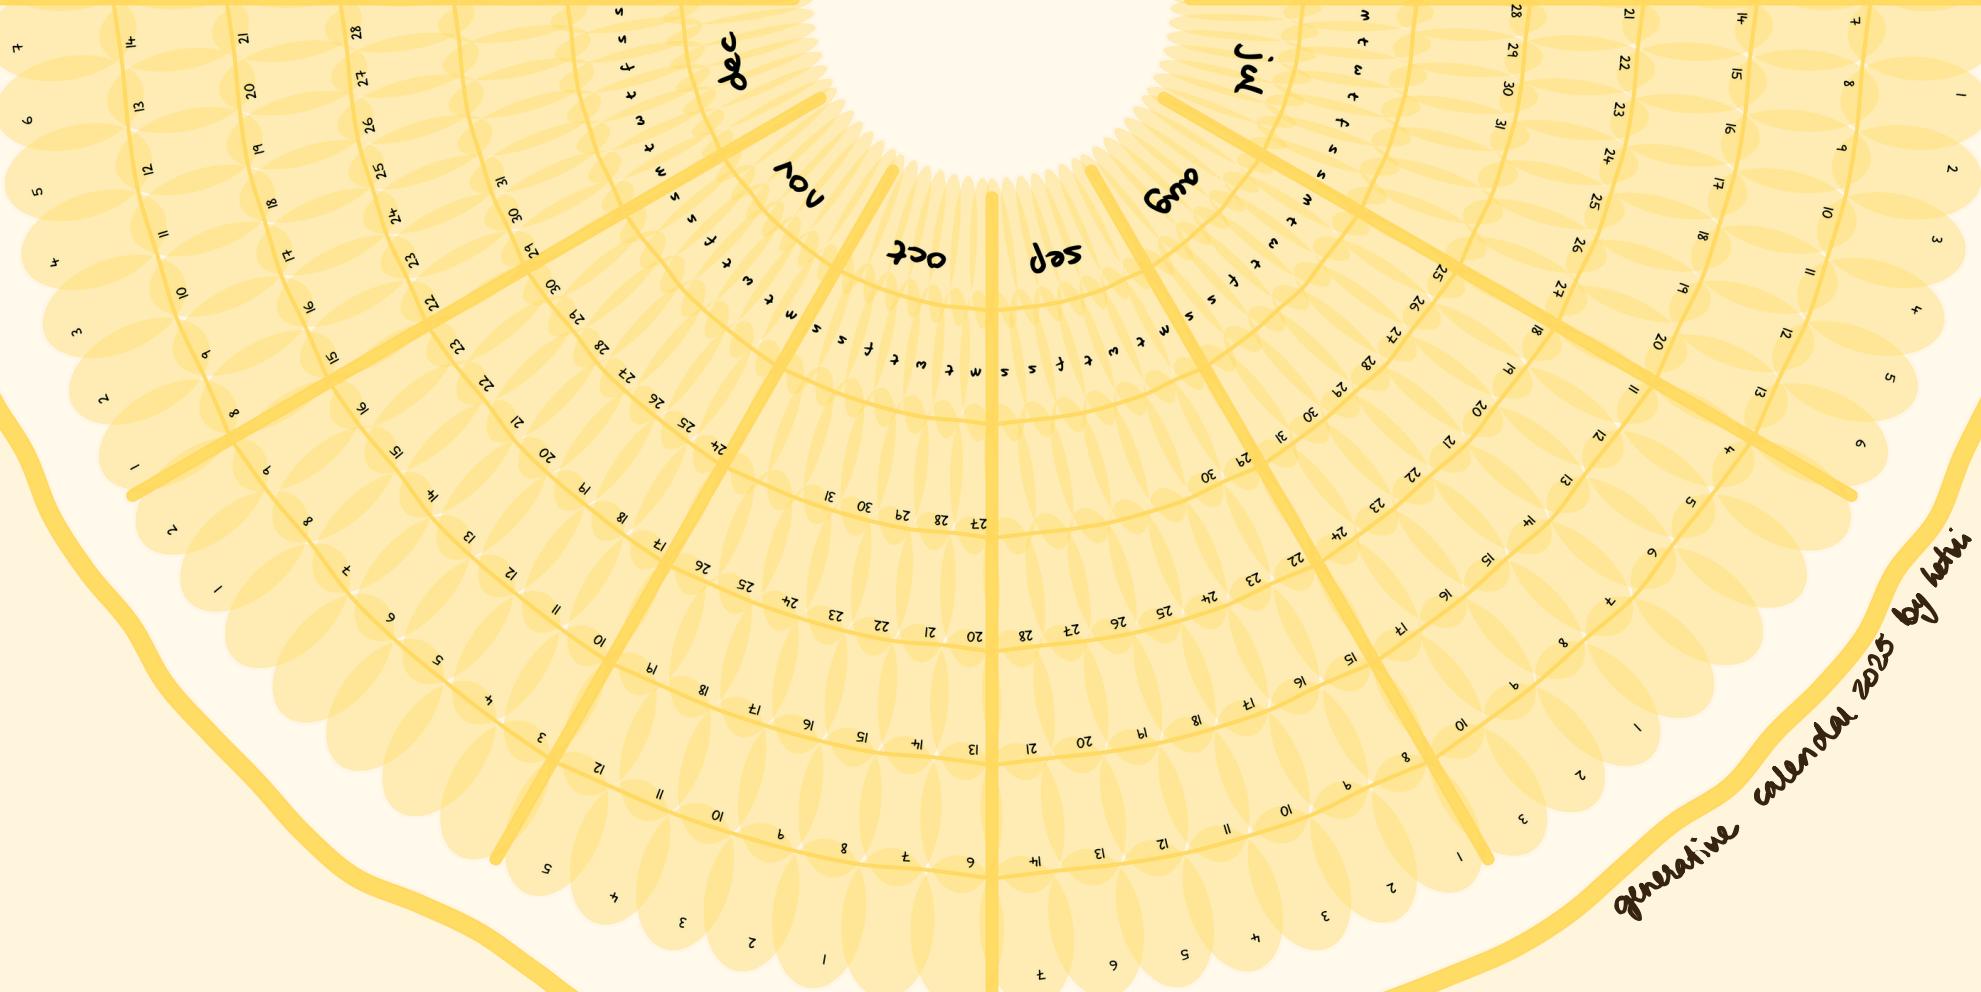

also, a huge shoutout to my friends esp niki for holding space for me while i hackathon-style coded this, and the lovelies in tugz and fgf that helped me have faith in the silliness of it all

**THANKS FOR BEING HERE, APPRECIATE YOU,
AND SENDING SO MUCH LOVE, CARE, WARMTH
AND SILLINESS YOUR WAY FOR 2025 <3**

generative calendar 2025 by hohi

printing instructions-

just print it in color on 2 different a3/a4 sheets depending on
the size you want

it'll be like half a lemon on each page

you can just tape them together from the back!
